WHY NOW

- Egypt online food delivery: USD 543M (2025), growing - duopoly platforms own the customer, brands don't
- Street food is the culture, but no modern Egyptian brand packages it for scale - the Zooba gap, in cup format.
- Every cup carries a QR: owned CRM from day one - scans, repeat, referrals, ratings - no platform rent on take.
- Halal-certified central kitchen + 4-minute finish: quality without chefs, capex-light formats (50-150k USD).

USE OF FUNDS - PRE-SEED 250K USD

THE ASK: pre-seed USD 250k for 18 months runway - 2nd cloud kitchen, 2 Cairo counters, path to 10 stores and Series A metrics.

Data room (NDA): cohorts, unit economics, scan-CRM funnels. Deck & one-pager: franchise gate on nilebites.com.
