

NILE LAB

FEATURES FROM THE FUTURE - SHOWCASE BOOK

19 living demos across three horizons:

H1 2026-27 (8) - H2 2027-28 (7) - H3 2028+ (4).

Every demo is clickable in the concept today; every demo lists what it needs to become production. Ethics rules inside.

NILE BITES - EGYPTIAN STREET FOOD. MADE TO GO.

CONFIDENTIAL - investor material - 2026

LAB ETHICS - SIX RULES

- 1. Discounts only down. Dynamic pricing never surges on hunger - only rescues waste.
- 2. Cameras look at cups, not people. Face detection off at model level; frames never leave the edge.
- 3. NFC and scans are opt-in. Tags carry cup-id only - no PII, no tracking without consent.
- 4. Bots disclose themselves. Voice and chat agents always say they are Nile Bot.
- 5. Forecasts never fire people. Staffing and roster decisions stay human, audit-logged.
- 6. Measured claims only. Public sustainability numbers come from the audited waste ledger.

A future feature ships only when its data, hardware and legal basis exist - otherwise it stays a demo here.
