

NILE BITES

EGYPTIAN STREET FOOD. MADE TO GO.

PITCH 2026

One cup. Many flavours. A brand built to scale.

CONFIDENTIAL

01 - PROBLEM

GREAT FOOD. NO BRAND OWNS THE STREET.

- Egypt's street food is culture - but fragmented, unbranded, invisible to tourists and platforms.
- Delivery duopoly (talabat/elmenus) owns the customer relationship and takes 20-30% of every order.
- Tourists want safe, fast, instagrammable local food; locals want consistency and speed at night.
- Existing chains import foreign formats - none sell "Egypt" as a modern food brand.

02 - INSIGHT

THE CUP IS THE PLATFORM. THE QR IS THE CRM.

- One format - hot bites in a clear cup - solves portability, photo-genics and speed (4 min service).
- Every cup carries a QR: rate your bite, join Nile Club, refer a buddy - owned first-party data.
- Scan CRM answers the investor questions early: repeat rate, channel mix, product quality by SKU.
- Brand system (gold-on-black, Nile line, Arabic display type) travels across cups, stores, cities.

03 - PRODUCT

FIVE FILLINGS. FOUR SAUCES. ONE UNFORGETTABLE BITE.

KOFTA 145 shawarma 140 shatta 150

cheese 125 (veg) nile shrimp 175 sizes 8/12/18

Sauces: Nile Garlic - Shatta - Tahini - Nile Signature (secret). Allergen matrix + kcal public.

CUP ECONOMICS

food + pack 37%

gross margin 63%

service 4 min

halal 100%

04 - BRAND & GO-TO-MARKET

CONTENT FIRST. STORE SECOND.

- 30-day UGC engine: #MyNileBite wall, rights-granted reposts, micro-KOL barter in resort zones.
- WhatsApp ordering with prefilled cup config - conversational commerce where EG actually buys.
- Talabat/elmenus as acquisition channels; own site + WA as margin channels; QR as retention.
- EN / AR (Egyptian register) / RU tourist layer - the only street brand speaking all three fluently.

05 - TRACTION MODEL

HONEST STAGE: CONCEPT -> FLAGSHIP -> DATA.

- Today: full brand + product concept, production-ready web skeleton, franchise kit, ops playbooks.
- Week 6: Hurghada flagship live (production rollout plan signed off, 6-week checklist).
- Month 3: first real cohort data - repeat, waste, SLA, scan funnel - replaces model numbers.
- Risk dashboard live from day 1: cancellations, refunds, waste, complaints, churn - no vanity metrics.

06 - UNIT ECONOMICS

ONE STORE. MATH THAT TRAVELS.

ORDERS/DAY

300

blended

AVG CHECK

EBITDA

22%

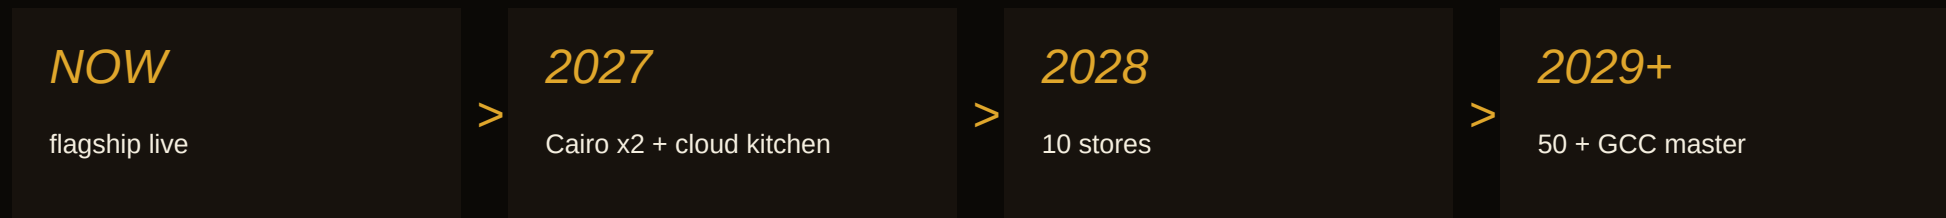

store level

Payback 3-8 months per point; formats: kiosk 50-80k, street store 80-120k, flagship 120-150k USD.

Waste target <3% (dashboard-tracked); SLA <12 min (KDS timers); cancellations target <2%.

07 - GROWTH

HURGHADA NOW. CAIRO NEXT. GCC AFTER.

- Franchise-light: company stores first, franchising after central kitchen #2.
- Resort seasonality hedged by Cairo office-lunch demand and delivery mix.

08 - MOAT

DATA, SUPPLY, SYSTEM. NOT A RECIPE.

- Owned scan-CRM: SKU-level quality + repeat data no platform can sell us back.
- Central kitchen + gram-level specs: taste identical in store #1 and store #50.
- Brand system + content engine: packaging that asks "where did you get that?" for us.
- Franchise playbook with risk dashboard culture: partners buy discipline, not vibes.

09 - TEAM

FOUNDER-LED. OPS-HIRED.

- Alla Miller - founder: brand, product, host of the concept; face of the Nile on all channels.
- Hiring with flagship: store manager (P&L owner), ops lead (SOPs/supply), content lead (UGC engine).
- Advisors in conversation: QSR supply chain, EG payments (Paymob ecosystem), resort-zone real estate.
-

10 - ROADMAP & ASK

SIX WEEKS TO LIVE. EIGHTEEN MONTHS TO TEN STORES.

W1-2	prod build, CMS, payments sandbox
W3-4	WA API, QR print, consent/legal
W5-6	load/a11y/SEO, soft launch
M3+	cohort data -> Series A story

ASK: USD 250k pre-seed - central kitchen #2, 2 Cairo counters, 18-month runway to 10-store metrics.

Milestones gated: each tranche releases on cohort/repeat/waste targets, not on calendar.

TASTE THE NILE.
